Kurt Camilleri

Software Developer

I'm a dedicated and results-driven Software Developer with close to 6 years of professional experience, primarily working with C# and the .NET ecosystem. I served as a Software Developer at Eunoia, where I've been responsible for guiding technical direction, mentoring developers, and delivering performant, scalable solutions.

My expertise includes LINQ, SQL, React, Azure services, and designing efficient backend systems. I focus on clean code, system optimization, and building maintainable software that meets business needs.

Maltese

Education

2017 - 2020
Bachelor of Science in Information Tech (Hons)
University of Malta
Software Development

Expertise

- C#, .NET
- LINQ, SQL, Entity Framework
- Microsoft Azure
- React, Javascript
- Git, Visual Studio, Azure DevOps
- Agile Methodologies

Language

English

Maltese

Experience

2024 - 2025
Eunoia
Lead Software Developer

Focused on team growth and performance, ensuring each team member had the support to reach their potential while stepping in to assist with development when needed. Took ownership of project planning, ticket creation, and delivery timelines, while actively participating in client meetings, requirement discussions, and project estimations to align technical execution with business goals.

2023 - 2024
Eunoia
Senior Software Developer

Took on a more planning and architecture focused role, supporting the team lead with task assignment, system design, and technical decision-making. Actively mentored teammates, provided guidance through code reviews, and ensured high code quality across projects.

2019 - 2023
Eunoia
Software Developer

Contributed to multiple products using C# and React, with a strong focus on backend development. Played a key role in delivering the company's XBRL solution, while also supporting frontend features as needed. Designed and maintained Azure-based systems, leveraging services such as Azure Functions, Service Bus, and Key Vault to build secure and scalable cloud solutions.

2018 - 2019
Umana
Junior Software Developer

Helped in the development of the company's primary mobile application using Java, with a focus on Bluetooth integration to receive signals from external devices. Designed and implemented real-time data processing and UI components to display context-aware information on Android devices.

Soft Skills

- Actively contributed to the company culture as a member of the social committee, organizing monthly events and initiatives to foster team engagement and a positive work environment.
- Supported team growth and quality through mentoring, code reviews, and knowledge sharing.
- Proactive and detail-oriented, with a strong focus on maintainable, secure, and scalable cloud solutions using Azure.
